Balram Maurya

Patiala, Punjab, India | Phone | Email | LinkedIn | Portfolio | GitHub

Professional Summary

Final-year Electronics and Communication Engineering student graduating in June 2027, interested in entry-level business analysis, product and operations roles. Built two live AI-assisted products, analysed 56K+ retail order-line records and managed an INR 2L+ budget across 8+ initiatives. Brings practical experience in customer-feedback analysis, reporting, requirements gathering and stakeholder coordination, supported by Excel, SQL and Power BI. Comfortable turning information into clear findings and following through on project tasks.

Education

Thapar Institute of Engineering & Technology, Patiala Graduation: June 2027

Bachelor of Engineering, Electronics & Communication Engineering (final year)

Skills

Business & Product: Requirements gathering, customer-feedback analysis, market analysis, user workflows, KPI reporting, problem-solving, documentation

Data & Reporting: Excel (formulas, PivotTables, budgeting), SQL, Power BI, DAX, Python (pandas, NumPy), data cleaning, validation, trend and profitability analysis

Operations & Coordination: Budget tracking, reconciliation, procurement follow-up, prioritization, task tracking, stakeholder coordination, cross-functional collaboration

Communication: PowerPoint, presentations, written reports, research synthesis, editing, written and verbal communication

Leadership & Business Experience

Finance Secretary — Institution's Innovation Council (IIC), Thapar Institute 2025 – 2026

- Managed an INR 2L+ budget across 8+ initiatives, tracking allocations, expenses and reconciliations through structured Excel workbooks.
- Coordinated faculty, student teams and vendors to gather requirements, align priorities, follow up on procurement dependencies and resolve execution issues within agreed timelines.
- Prepared financial summaries and standardized supporting records for faculty review, improving documentation consistency and making initiative status easier to track.

Projects

ProductPulse — Customer Feedback & Product Insights Live Demo

- Built and launched a live application with analysis workflows over 500K+ customer reviews, organizing feedback into sentiment, recurring pain points, feature requests and product strengths.
- Designed the workflow from CSV upload and sampling to visual insights and downloadable reports, making unstructured feedback easier to review for product and business decisions.
- Integrated AI/LLM APIs with fallback handling and output validation to address provider failures and inconsistent results.

Venture Autopsy — AI-Assisted Business Idea Evaluation Live Demo

- Designed and launched a platform that evaluates startup ideas through market analysis, risk mapping, financial modelling and practical validation steps.
- Created structured user workflows and Milo, a context-aware companion that explains findings, highlights assumptions and recommends validation experiments in plain language.

RetailPulse — Business Performance & Profitability Analysis SQL, Python, Power BI

- Cleaned and modelled 56K+ retail order-line records using Python and SQL to create a consistent foundation for business reporting.
- Built Power BI views of revenue, gross profit, margin, orders and customers across monthly trends, product categories, cities and sales channels.
- Reconciled reporting outputs against SQL and Python results and analysed discounting and category profitability to identify potential margin improvements.

NEO — Mobile Companion Robot Completed | Final-Year Project

- Completed a four-wheel companion robot with display, audio and Wi-Fi communication; resolved integration issues through iterative testing and troubleshooting.
- Connected the host application and ESP32 to deliver commands and responses wirelessly, integrating display and audio interaction on one platform.

Publishing Experience & Achievements

- Published 5+ books as Sterling Moriz, including 5 Proven Secrets to Crush Procrastination and Master AI Productivity (co-authored with Alex Ross); managed research, planning, writing, editing and digital publishing.
- Round 2 selection with Team AGNIV, ISRO Robotics Challenge–University (IRoC-U 2025); Innovation Ambassador (Level 2 — Advanced), IIC; Participant, Axxelrate 2026.
